Investing in the quantum future
Who we are

We are a Paris based early stage venture capital fund investing worldwide in Quantum Technology & Deep Physics

Deep Physics  Quantum Cybersecurity  Quantum Computing  Quantum Sensing
4 strategic sectors balancing short and long term

Deep Physics
- Computational Imaging
- Optical Co-processors
- LIDAR
- Metasurfaces
- Quantum enhanced optomechanics
- Gravimeter
- Atomic clock
- Nano-Magnetometry Electrometry
- Quantum Sensing

Quantum Cybersecurity
- Quantum Random Number Generator
- Post Quantum Cryptography

Quantum Computing
- Quantum materials design
- Drug Discovery
- Industrial Optimization
- Financial Modelling
- Encryption breaking
- Machine Learning
- Fluid dynamics

Quantum Internet
- Long distance Quantum Key Distribution Network
- Blind Computing

Sample of technologies. Figure not exhaustive.
Deal flow & Investments

>200 Companies monitored

>70 Co-investors identified

- Quantum Computing Hardware: 25%
- Deep Physics: 33%
- Quantum Computing Software: 17%
- Quantum Sensing: 11%
- Quantum Comm.: 11%
- Others: 3%

Companies monitored: KETS, Lighton, PASQAL, quantum benchmark, CRYPTO, qnami.
What we do – “smart money”

- Pre-seed funding - Q1 2019
- Matching investment from BPI France
- Seed funding - Q4 2019
- Lead Investor Series A + co-investors / roadshow - S1 2020
- Board position: support to CEO & staff on operations and strategy
- Support to business development, access to large corporates worldwide
- Letters of support for non dilutive grants
- Broker partnerships with software startups in portfolio or network
- Communication, build awareness

Startups, academics, large corporates whether vendors or users, investors, national and local authorities, future employees and quantum enthusiasts …

are stakeholders in a quantum ecosystem to be built collectively.
A unique program for entrepreneurial scientists and engineers to accelerate their startup projects

Applications are now OPEN to join the 3rd French Cohort Program!
